

BIO FRESH & BIO FRESH TRIPLE ACTION®

Microbiological agent for odor control and cleaning. Contains spores of microorganisms that are activated upon contact with organic residues and actively break down them. Nature's own and environmental solution to problems with smelly waste and spill.

Bio Fresh Triple Action also contains an amino acid complex and biodegradable odors that together provide effective and immediate as well as long-term control of bad odors from all types of organic waste and spillage (milk, vomiting, urine, stools, blood, rubbish, etc.).

- Microbacterial agent with the same bacterial flora found in the human gastrointestinal tract.
- Used both to prevent bad odors from occurring and to solve acute odor problems.
- Fast-acting odor control is achieved through an amino acid complex that binds and disables all types of odor from organic material together with natural etheric oils that hides already formed smelly organic substances until permanent odor control is achieved.
- Permanent odor control is achieved by subsequent microbiological degradation of bound as well as free smelly substances.

The microorganisms in Bio Fresh (Triple Action) provide lasting odor control by breaking down deacted odors and by preventing new smelly substances to take form. The microorganisms in Triple Action simply outperform the bacteria that cause the bad smell. Chemical disinfectants, on the other hand, kill all bacteria without distinction.

For further information and dosage refer to the current safety data sheet for the product.

APPLICATION METHODS

Odor control on **damp** surfaces: Spray Bio Fresh (-Triple Action) undiluted.

Odor control on **dry and absorbent surfaces**: Spray Bio Fresh (-Triple Action) diluted with 3 parts water.

CLEANING

1. Moisten the surface to be cleaned with **Bio Fresh** (use hand spray)
2. Spots are machined mechanically with brush or the like.
3. Let **Bio Fresh** work for 5-30 minutes.
4. Rinse with lukewarm water.
5. In case of severe odor problems, the surface is again sprayed with **Bio Fresh**.

Bio Fresh can also be used for odor control after cleaning with traditional detergents.

NOTE! If acidic agents have been used, rinse thoroughly with water before **Bio Fresh** treatment.
